O'BRIEN

**For HOME,
INDUSTRY
and FARM use**

*Indoors-Outdoors
over any
paintable surface*

Flexico Enamel

O'Brien's Flexico is a top quality, multi-purpose enamel which can be depended upon for maximum beauty and protection when used for residential and industrial decorating and maintenance.

Made with exclusive Alki-therm, it can be used with superlative results both indoors and outdoors — on any paintable surface — over wood, metal, plaster, hardboard, etc. Dries quickly to a smooth, hard lustre finish.

Flexico Metal Primers

These special metal primers are to be used on new bare metal or on metal surfaces which have rusted and require a prime coat before finishing with Flexico Enamel or paint. Come ready to use. (Follow label directions). *When applied over rusted surfaces, thin 25% with special Flexico Primer Reducer.* Allow 48 hours drying. Pigment and vehicle formulation of *Red Primer* is same as U.S. Gov't Spec. TTP-636B.

Superior gloss retention	X	X	X
Maximum washability	X	X	X
More coverage per gallon	X	X	X
Colors for every decor/use	X	X	X
Won't chip — sticks tight	X	X	X

With the Flexico system, you can effectively check rust and corrosion. It's the best answer to your painting problems on both new or old rusted surfaces.

Colors for Every Purpose and Decor

Flexico colors are keyed to meet the requirements of all users of hi-lustre enamels — and range from the delicate pastels, most popular for wall, trim and cabinet use, to the deeper and brighter colors for farm machinery, industrial maintenance, plant identification, etc.

In addition to being available in regular size packages, many of the standard colors come in handy, non-clog nozzle spray cans — for quick, easy painting of furniture, equipment, intricate objects. (S) behind color name indicates it's available in spray can too.
